Windows 11 Configuration and User Support

Omar Khalil | Portland Community College | CIS 140M

Guided academic lab • Entry-Level IT Support Portfolio

Overview

Explored Windows 11 personalization and common end-user support settings through guided support scenarios.

Tools and environment

Windows 11 Settings, Hyper-V/XtremeLabs, File Explorer

Work demonstrated

- Windows 11 desktop organization and personalization
- Accessibility guidance for text size, Magnifier, contrast themes and pointer appearance
- Locating printer and scanner setup options
- Finding display-language and lock-screen settings
- Organizing files and folders in File Explorer

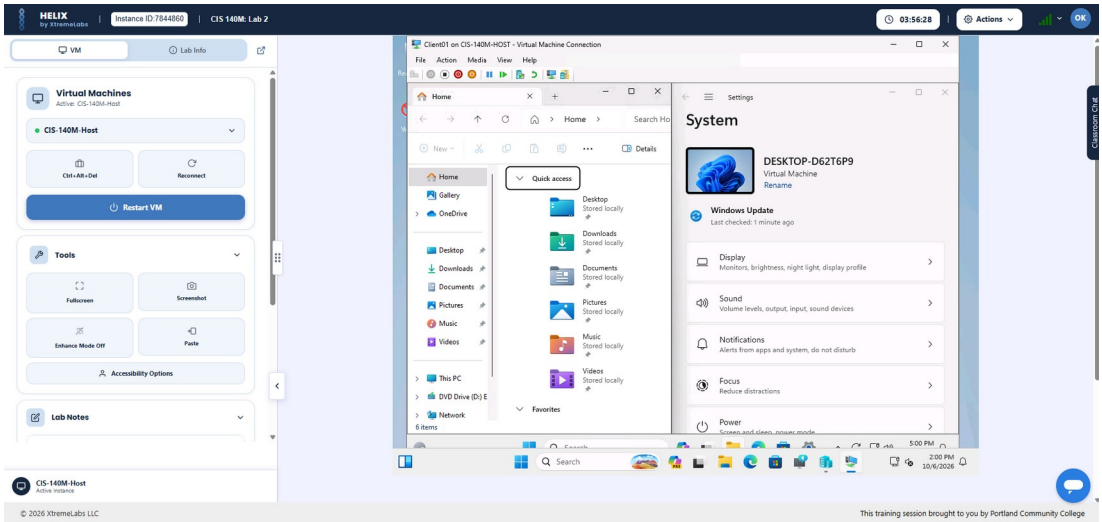

Relevance to IT support

This coursework demonstrates familiarity with Windows administration interfaces, following technical procedures, documenting results, and basic troubleshooting concepts used in entry-level Help Desk and Desktop Support roles.

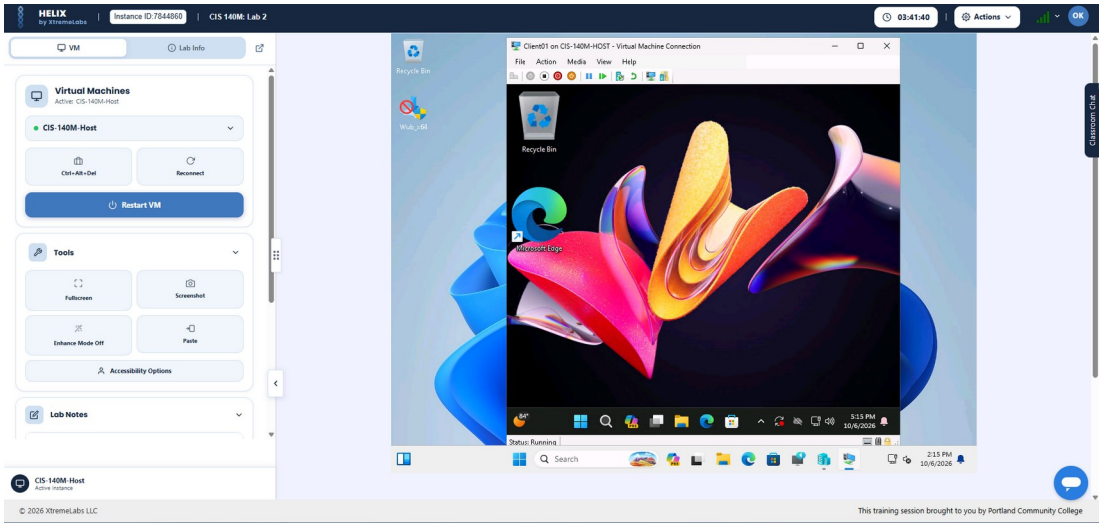

Selected Lab Screenshots

Screenshots captured during the guided virtual lab. Original XtremeLabs interface is visible in some images.
